

Built-for-Government Business Intelligence

_experience the commitment™

Introducing the AMS infoAdvantage Dashboard

With AMS infoAdvantage Dashboard, organizations improve insight into business operations with key performance metrics and visual, interactive analytics. Dashboard includes:

- Financial Management analytics
- Procurement analytics
- Human Resources Management analytics
- Common Metric Repository

ENSURE COMPLIANCE, DRIVE DECISION MAKING

Information is at the core of state and local government business. How well are we managing assets? What results were achieved? How did programs perform in their mission? What is driving success? Enterprise resource planning (ERP) systems centralize enterprise information—making it easier to capture, consolidate and report.

Growing demands for improved accountability and performance are changing the way governments think about their information. Stakeholders require insight—not just information—to drive decision-making and problem-solving. Governments need improved multidimensional, real-time data access to analyze program services, measure effectiveness, ensure effective delivery, and predict change.

CGI is committed to these needs with a powerful combination of modern technology and a comprehensive, integrated, configurable AMS infoAdvantage reporting solution. Powered by Business Objects' award-winning technology, AMS infoAdvantage unlocks the potential of distributed data within AMS Advantage® and across disparate sources seamlessly—helping organizations transform data into information they can act on.

Beyond reporting

The concerns of today's governments go beyond basic reporting to include assessing how well the organization is doing and defining improvements. With ad hoc querying, online analytical processing, drill-through capabilities, visual analytics, and electronic report distribution, CGI is helping government organizations balance their reporting requirements, business intelligence demands, and performance management goals.

- Demonstrate improved program performance and mission effectiveness
- Achieve better organizational transparency and accountability
- Accomplish tighter strategic planning and program budgeting
- Achieve faster, more event-driven decision making
- Monitor activity, redirect staff and resources, and reduce costs
- Identify important drivers for success
- Probe insightful "what-if" scenarios

Improve performance and demonstrate results

Business intelligence (BI) provides users the most-requested information reliably and securely, via the Web or embedded in enterprise applications. But to truly experience transformation, people inside your organization need the ability to interact with business information without having to understand complex database languages and structures. By learning how to use query and analysis capabilities in AMS infoAdvantage, they can see—at any point in time—the status of a project, agency or department and the areas that need improvement.

Benefits	Descriptions
Efficiency	<ul style="list-style-type: none"> Produce timely, accurate, relevant financial, operating reports to comply with regulatory mandates, reducing the risk associated with noncompliance Enable staff and management to make the right decisions based on actionable intelligence Help governments streamline and integrate cross-agency services through an integrated approach—enabling agencies to support, share, and safeguard electronic citizen data Provide automatic alerts of how the agency is performing against budgets, metrics, and other goals, so you can make timely improvements to underperforming programs and expand programs that exceed service goals
Access to Information	<ul style="list-style-type: none"> Provide on-demand, self-service budget, appropriations, and performance reporting, so agency staff can create reports and react to information with minimal reliance on IT support Enable monitoring of key performance indicators with management dashboards Track outcome-based program performance, gauge agency-wide progress toward goals, and highlight performance trends Use custom graphics and interactivity to develop and present compelling, easy-to-understand financial models and business summaries that are fully interactive in Microsoft Office, PDF and the web Evaluate multiple what-if analyses quickly with visual sliders and dials Provide visual modeling to bridge the gap between data analysis and visual presentation Apply the power of innovative design
Reduced Total Cost of Ownership	<ul style="list-style-type: none"> Gain a single source of truth that allows executives and staff to make more informed decisions by standardizing on a single platform Enable one-click integration of your interactive data visualizations and models into PowerPoint slides, Word and PDF documents, Outlook, and the Web Enable faster, more effective program decisions that let you deliver improved citizen services during times of constant change
Improve efficiency and cut costs without impacting critical services	<ul style="list-style-type: none"> Define key performance measures Easily monitor metrics Leverage visual, interactive analytics using Dashboard to drive decision-making

CORPORATE PROFILE

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in clients' challenges and delivering quality services to solve them. A leading IT and business process services provider, CGI has approximately 25,000 professionals operating in 100+ worldwide offices.

With AMS Advantage, our industry-leading ERP suite, CGI has helped 190+ state and local organizations better serve 90+ million citizens.
