IPCentricITy™ Service Delivery Solution

FEATURES AND BENEFITS

Solution features:

- Service portability across networks
- Flexible, open integration environment
- Resource reuse for new service delivery
- Single-point OSS/BSS and integrated service introduction
- Cross-domain functionality that facilitates interaction with existing services and network operations

Solution benefits:

- Rapid new service development and delivery
- Reduction in service integration costs
- Brokering and bundling for end users
- Open standards based technology
- Fast, easy evolution of existing services

A RAPID SHIFT TO A COMPLETELY NEW WAY OF DOING BUSINESS

For telecommunications providers who want to offer innovative convergent services to their customers, the IPCentricITy™ Service Delivery Solution (SDS) is the next generation service delivery solution that accelerates the introduction of new innovative and convergent services.

Transforming how people communicate, IP is driving network convergence. The migration of all communications services to a single, IP-based network is the single biggest driver of change and innovation in the industry today. CGI refers to this revolutionary trend as IPCentricITy™—a concept that encompasses our overall vision and action plan for the future of the communications industry.

Getting you where you need to go

CGI's IPCentricITy™ SDS is an open standard, feature rich service delivery architecture that delivers next generation IP services. It provides a framework of application components, templates and tools for the rapid design and development of revenue-producing services. This framework facilitates the end-to-end introduction of new services quickly and easily, as well as allowing the efficient management of network operations. All this, while being supported by a standards-based architecture.

The strategy: develop once, use everywhere.

Service Delivery Solution

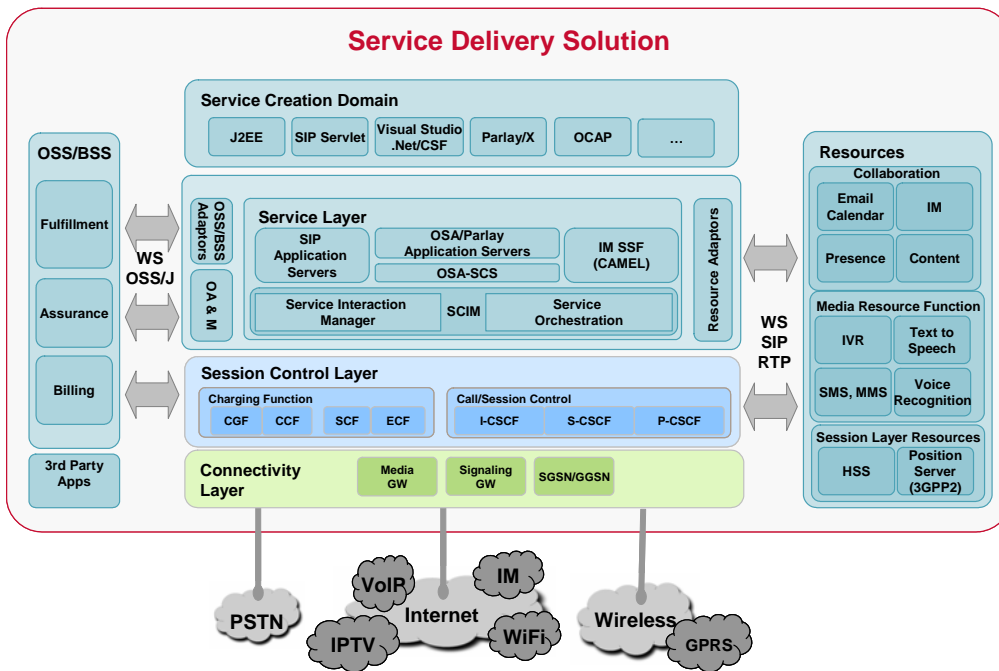

Within our IP Solution Center, we are able to test and demonstrate enabling technologies as well as next-generation services that can increase your revenues and keep you ahead of the competition. CGI provides thought leadership, service creation and integration for applications like (but not limited to):

- Information-based screening
- Service portability
- Explicit quality of service
- IP conferencing
- Messaging
- Location-based services
- Multimedia services
- Shared media resources, content delivery services, support for multiple commerce methods—prepaid, post-paid, retail and wholesale.

All of the above are based on open APIs such as SIP servlets, JAIN, and OSA/Parlay.

A RAPID SHIFT TO A COMPLETELY NEW WAY OF DOING BUSINESS

COMPANY PROFILE

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in our clients' challenges and delivering quality services to address them.

A leading IT and business process services provider, CGI has approximately 26,000 professionals operating in 100+ offices worldwide, giving us close proximity to our clients. Through these offices, we offer local partnerships and a balanced blend of global delivery options to ensure clients receive the combination of value and expertise they require.

CGI defines success by exceeding expectations and helping clients achieve superior performance.

Succeeding in a changing industry

Pressure is intense for service providers to gain agility and survive and thrive in the rapidly changing communications industry. The challenge is to implement technologies that will achieve essential business results and even more. Within the context of IPCentricity™, CGI has formalized innovative approaches for the definition, design and delivery of revenue-producing services using IP technology, enabling our clients to move boldly ahead in an IP centric world.

The future is now.
