Predictive Analytics

A Partner of Choice

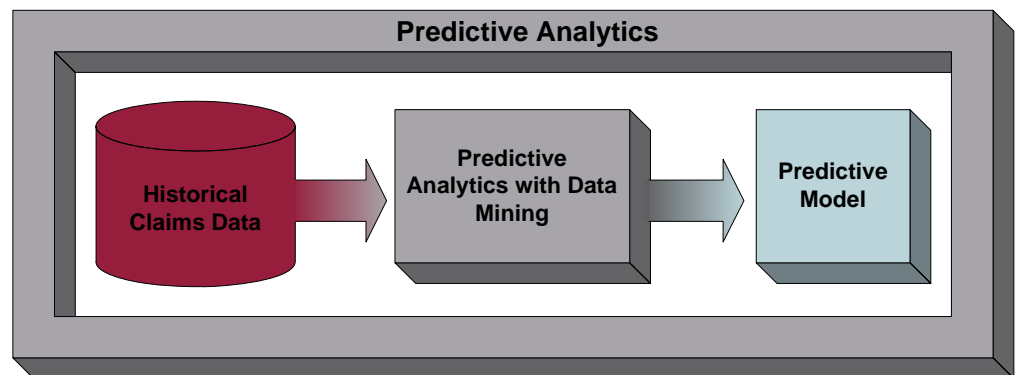

CGI is a leader in providing innovative business and technology solutions to the healthcare payer industry. Our clear vision and ability to deliver results has made CGI the partner of choice for many BlueCross BlueShield plans, commercial health insurance companies, government healthcare payers and Prescription Benefit Managers (PBMs). Solutions designed for healthcare payers include:

- CAS 5.0 software for comprehensive claims auditing and fraud and abuse detection
- Clinical and compliance auditing
- Prescription benefit claims auditing and analysis services
- Medicare Advantage and Part D services
- Member enrollment, billing and call centers
- Reimbursement consulting and pricing solutions
- Fraud investigation services including special investigative unit outsourcing and co-sourcing
- Complete IT services

CGI understands the need to be proactive in identifying fraud in the healthcare industry. To assist healthcare payers, CGI developed the Predictive Analytics component for our Customized Audit System (CAS 5.0), which detects potential fraud risks before they happen—saving your organization both time and money. The Predictive Analytics component uses a variety of techniques, from statistics to data mining, to process current and historical claims data and ultimately make predictions of future fraud events.

The Predictive Analytics component combines your business rules with algorithms to analyze historical claims data and capture suspicious fraud indicators, factors or behaviors. Business rules can be updated in the component as your business needs change, or new rules can be added for specific events or new indicators.

Based on the analysis, a predictive model is established. The Predictive Analytics component then applies this model to new data that has never been processed to predict claimant behavior and identify both unknown and new fraud risks. This model can also be applied to new data sets or revised for other data sets to predict variations of potential fraud.

Predictive Analytics and CAS 5.0 provide unparalleled data analysis and audit administration within a single platform, enabling organizations to analyze claims and effectively detect forms of suspicious behavior.

Customized Audit System (CAS 5.0)

An enterprise-wide solution that helps you efficiently predict, identify, manage and analyze your medical and pharmacy claims

Why select CAS 5.0? This browser-based claims audit tool is unique to the industry because it is designed to your specific business rules and reimbursement methodologies. CAS 5.0 is an enterprise-wide solution that can help you:

- **Predict**—Uses advanced algorithms to predict potential hidden patterns and anomalies within the entire claims data universe.
- **Identify**—Identifies the claims that have the highest potential for revenue optimization through a series of edits, allowing you to easily work on these claims.
- **Manage**—Provides an efficient and comprehensive workflow that includes tracking the entire audit process, recording the findings and generating the associated letters and reports so you can spend more time on the review process and less time on administrative tasks.
- **Analyze**—Provides analytical tools that allow you to easily research claims and audit data through a series of views. This is accomplished at the user level, freeing up valuable IT resources.

Company Profile

CGI is in the business of satisfying clients. For 30 years, we've operated based upon the principles of sharing in our clients' challenges and delivering quality services to solve them. A leading IT and business process services provider, CGI has approximately 25,000 professionals operating in 100+ offices worldwide.

CGI has a solid track record of on-time, on-budget delivery and high-value repeat performance. Our methodologies and best practices ensure we deliver results and serve as an accountable, flexible and objective partner.

We define success by exceeding expectations and helping clients achieve results.
