

Built-for-Government Scalable Technology

CGI's government ERP solution and technology has helped 5 out of the top 10 state governments become 2006's leading Digital States as awarded by the Center of Digital Government.

PROVEN BUSINESS ARCHITECTURE FOR GOVERNMENT TRANSFORMATION

Today's state and local government leaders expect to be more productive than ever. Using IT, people and information they are enabling transformation; improving efficiency, reducing costs and making management decisions that benefit their citizens. For these organizations, ERP systems remain a driving factor, delivering technology standards and a unified infrastructure foundation.

Several trends are nipping at the heels of transformation, however, constraining options; the increasing "lock-in" to single suppliers for operating systems and databases. The overused myth of configurability; that any ERP system can be configured to work for government. And lack of scalability is rarely a simple matter of increased processing power or additional memory.

At CGI, we are committed to serving the technology needs of state and local government with a powerful combination of standard, scalable technology and comprehensive, integrated, built-for-government ERP software.

Beyond basic IT

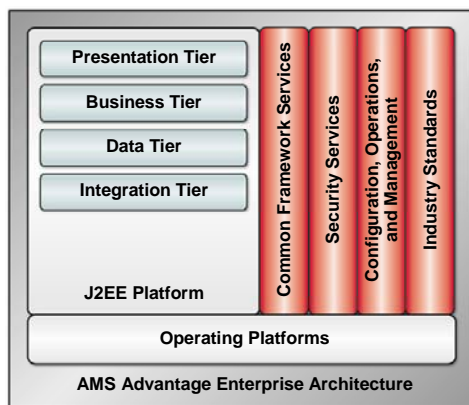

With AMS Advantage® ERP, state and local governments establish a technology foundation for balancing short-term operational initiatives with long-term and more-complex strategic initiatives.

- **Standardization.** Architected upon open standards, n-tiered and service oriented architecture, our web-based technology promotes interoperability, reducing adoption costs and preventing vendor "lock in."
- **Customization.** Built-for-government functionality enables rapid implementation time and controls costs, avoiding the common pitfall of customization and configuration that can quickly escalate into millions of development and long-term maintenance dollars.
- **Scalability.** Architected for growth, AMS Advantage ERP scales in the same ways that government organizations scale, from internal growth, to changes in responsibilities and constituencies, to changes in relationships with vendors.
- **Management/Governance.** A modular approach for functional communication delivers standardized reporting across the solution from a core data warehouse.
- **Acquisition.** With the enterprise-wide licensing of AMS Advantage ERP solution, clients don't pay for the things that typically drive up the acquisition price, for example, additional users, and implementation of a process that was not original project scope.

Innovative technology, proven in state and local governments

CGI's thought leadership and innovation demonstrates our commitment to providing our clients with the best technology foundation available to enable their goals. With our built-for-government AMS Advantage ERP solution our clients are transforming paper-intensive processes into online efficiencies. Proven architected upon open standards, n-tiered and service oriented architecture (SOA) our web-based technology is helping our clients keep pace with change.

At the same time, we understand our government clients seek proven technology solutions. With AMS Advantage ERP, government organizations establish the technology for today's needs that includes a foundation for keeping pace with the rapidly changing technology landscape of the future.

Proven, Adaptable Foundation

- Web-based, n-tiered, zero foot print, HTML client
- Table-driven visual configuration
- Vendor agnostic, highly scalable runtime engine
- Model Driven Architecture (MDA)
- Service Oriented Architecture (SOA)

Integration and Interfacing

- Architected for maximum integration flexibility
- Non proprietary open standards, XML integration

Sophisticated Reporting

- Best-in-class Reporting and Analysis Tool
- Data collection and aggregation from multiple data sources
- Open XML-based metadata repository, object oriented design

COMPANY PROFILE

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in clients' challenges and delivering quality services to solve them. A leading IT and business process services provider, CGI has approximately 25,000 professionals operating in 100+ worldwide offices.

Through our leading ERP solution, AMS Advantage, CGI has helped 190+ state and local organizations better serve 90+ million citizens. Designed exclusively to support the business of government, CGI's AMS Advantage solution allows clients to improve operational efficiencies, constituent services and performance— all while reducing costs.

For more information, contact CGI at 1.800.321.0267.

Benefits

- Achieve interoperability, reduce adoption costs and prevent vendor "lock in"
- Achieve more rapid implementations with a framework to deliver government-specific business process requirements
- Achieve reduced total cost of ownership (TCO) and avoid long-term maintenance costs through ease of software updates, upgrades, and integration
- Achieve today's goals, establish a standard foundation for quickly scaling to future needs
- Achieve quicker integration of functionality, processes and data for improved reporting and information sharing
