

# Lean Agile DevOps pivots for powerful results

The fast pace of innovation today forces an adaptive business model across all industries to stay competitive. We see our clients seeking transformative solutions that meet rising customer expectations.

From our deep experience, agile approaches to product releases must be buffered with lean principles and DevOps to address multiple layers of operational efficiency. Our Lean Agile DevOps (LADx™) pivot framework helps our clients achieve transparency and alignment in delivering innovative solutions to achieve true business agility.

## Bringing rigor to agile with the LADx Pivot Framework

We partner with our clients to build and align programs to deliver solutions and products with faster time to value. We bring strategy consulting, design thinking, and deep technical expertise to drive innovative and measurable results for our clients.

Our LADx framework helps organizations understand business complexities and design solutions from the earliest stages of a project. When we apply our LADx framework to teams working on strategic programs, we see increased communication, adaptive planning, evolutionary development, early delivery, continuous improvement and rapid and flexible responses to change. This 'agile at scale' approach enables and supports digital transformation and business agility by maximizing opportunities for product innovation and team performance.

## Agile methods to accelerate Business Agility

Our LADx framework accelerates agile programs to enable the following:

- **Agile fluency** – Our experts consult with clients to understand strategic goals and bring agile fluency to legacy or greenfield solutions.
- **Pivot strategic planning** – We help our clients build a pivot strategy with a roadmap and a tactical plan that aligns product

## Why CGI?

- First Scaled Agile Global SPCT Transformation Partner
- Over 250+ certified SAFe® Program Consultants (SPCs) and 8,400+ SAFe-trained consultants worldwide
- 100+ Agile Release Trains Launched and 15,000+ Trained
- Proven experience through successful client stories on enterprise wide pivots
- Agile thought leadership
- Focused on people, process and technology approach
- CGI LADx (Lean Agile / DevOps) pivot framework
- CGI Agile Skill Adoption program (CGI – ASAP)

strategy with the LADx pivot. CGI LADx implementations are high discipline, high fidelity, and cost-efficient.

- **Enterprise agility** – Our expert’s partner with client teams to optimize integration, collaboration, alignment, and communication. Example collaboration opportunities include enterprise-wide portfolio Agile Release Train (ART) pivots, mitigating cross portfolios dependencies and better alignment.
- **Global agile delivery model** – We enable teams with certified agile practitioners who provide both excellent technical skills and agile leadership skills. We can provide complete agile teams or supplement client teams with strategic roles and distributed agile delivery capabilities that leverage our global delivery centers.
- **Coaching and training** – CGI agile experts are available to train and coach diverse teams to align around common goals. We help our clients grow agile leaders and change agents within their organization. Our unique training materials and skills enablement help leaders pivot from modern management to lean agile leadership.

## Ensuring success with our LEAP Change Framework

Our subject matter experts have created unique methods and implementation strategies through practices discovered and developed through our partnership with clients. We apply our Lean Enterprise Agile Platform (CGI LEAP™) change framework to teams looking to drive sustainable change.

### Proven results

We have hands-on experience creating, testing and deploying lean, agile, and DevOps methods and processes that deliver high fidelity, scalable change at some of our largest clients. We see these clients shifting their focus from solely agile to the full LADx spectrum where all agile, lean, and DevOps approaches are delivered simultaneously to drive sustainable digital transformation.

Our LADx framework is grounded in design thinking, lean, business process reengineering, principal driven execution, evidence-based practices, behavioral economics, human psychology, and transformational leadership.

Our experts have a proven record of accomplishment in helping clients realize benefits, including:

- Accelerated software delivery
- Improved engagement with effective business IT alignment.
- Increase in productivity with reduced cost
- Enhance delivery predictability with better portfolio roadmap
- Built-in quality with every released capability
