Geospatial
Better understand the added value of geospatial intelligence in your organization

30+ training specialists with first-hand experience in the industry, including 7 SAFe trainers
60+ courses in our portfolio, including training sessions and workshops

Agile

Topics covered

- Agility basics
- Agile frameworks: Scrum, Kanban
- Agile project management
- Agile requirements and the role of the product owner
- Technical training (TDD, Agile architecture, BDD)
- Scaled agility (SAFe) and organization agility
- Training courses for agile leaders and managers

Whether you want to boost a team or transform your entire organization, we have the accelerators you need.

All of our trainers are experienced professionals currently working on large-scale transformation projects.

Thanks to their unique expertise, they will not only teach you but also advise and support you in overcoming challenges that arise as your business evolves.

SCALED AGILE
PARTNER
GLOBAL
SPCT

Office 365

Topics covered

- User training
- Collaborative work, efficient communication & information sharing
- How to use the various services
- Training for operators
- Cloud computing concepts
- Office 365 identity & authentication services
- Security, privacy & compliance
- Office 365 service administration

CGI firmly believes that, when deploying Office 365 services, change management should be prioritized over technology.

Guidance from change management experts significantly contributes to the success of the projects and the adoption of the services by users and operators.

Within our range of change management and technical services, CGI offers a wide selection of training courses for all Office services for both users and operators.

Microsoft Partner
Microsoft

Gold Productivite cloud
Gold Messaging
Gold Collaboration et Contenu
Gold Security
Gold Gestion de la mobilite d'entreprise

Azure

Topics covered

- Introduction to Azure services
- Cloud computing concepts
- Services available in Azure
- Security, privacy & compliance
- Azure for administrators
- Resource and subscription management
- Azure for technical architects
- Infrastructure deployment & configuration
- Security & implementation
- Application development & deployment
- Authentication & data security implementation
- Storage

Our partnership with Microsoft enables us to support you in all aspects of an Azure deployment.

Our trainers, many of whom are certified by Microsoft, all have practical experience in Azure solution implementation.

With their hands-on expertise, they can share knowledge that comes not only from theory, but above all from practice. Having already experienced all the challenges, they will be able to provide valuable knowledge during these training sessions.

Geospatial

Topics covered

- Geospatial intelligence
- Location data management
- Georeferencing
- Geofencing
- Process automation

Better understand the added value of geospatial intelligence in your organization.

Our training courses are intended for decision makers and professionals to develop the skills needed to manage geospatial data more effectively, optimize analysis methods and streamline the time-to-market of new geospatial intelligence applications.

The main topics covered are:

- Managing geospatial data with cloud solutions and big data
- Automating geo-referencing and real-time on-site analysis
- Implementing a corporate platform and a knowledge centre

ABOUT CGI

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. Operating in hundreds of locations across the globe, CGI delivers an end-to-end portfolio of capabilities, from IT and business consulting to systems integration, outsourcing services and intellectual property solutions.

CGI works with clients through a local relationship model complemented by a global delivery network to help clients achieve their goals, including becoming customer-centric digital enterprises.
