

Lifecycle Asset Management with Sunflower Solutions

Managing the full asset lifecycle is a complex process. Effective management, control and use of property brings many challenges.

Sunflower asset management solutions support the full asset lifecycle process, while enabling program and mission success.

Asset managers are required to maintain accountability in environments that challenge them daily with decentralized receiving, changing regulations, multiple acquisition methods, advances in technology, variable demand, business unit reorganizations, and the transfer and deployment of large quantities of assets to the field.

Sunflower solutions simplify asset management by providing software tools and business solutions to increase accountability and comply with regulations as an outcome of everyday tasks. These premier software solutions track physical and financial accountability for all assets, from acquisition through disposal. These web-based lifecycle asset management solutions are designed to address local as well as global asset management challenges for federal agencies, commercial organizations, universities, research laboratories and state and local governments.

Sunflower Assets

Sunflower Assets®, the core solution in the Sunflower portfolio, enables property managers to monitor, control and account for all property types and all property transactions.

Sunflower provides web-based forms and integrated mobile solutions for receiving, life cycle transactions, physical inventory, shipping and excess management, in order to simplify property processes and enable compliance as an outcome of everyday asset management tasks.

All types and classifications of property, including personal and real property, material, capital, sensitive, IT assets, vehicles, weapons,

Sunflower
Asset Management

scientific equipment, uniforms, parts, tools and more, can be managed within Sunflower Assets®.

Sunflower Support of the Asset Lifecycle

The Sunflower Assets® solution supports program and mission success through effective and efficient lifecycle asset management solutions. All required data elements for government property items are at your fingertips.

- **History:** Review a perpetual history record of every transaction for each asset. Auditable summary and detail level information displayed with a username and time stamp for each transaction.
- **Reporting:** Report on current asset information, look back at a single point in time or trend the changes to your assets over time.
- **Financial Information:** Complete and auditable history of financial events (capitalization, value increases or decreases, depreciation and write-off) from obligation of funds through asset disposal.

Take Control of Asset Management Tasks

- Manage physical and financial accountability in **Sunflower Assets®**—a single web-based system that makes property activity easy to record, simple to retrieve, accessible from anywhere and completely auditable.
- Use **Sunflower mobile solutions** for asset receiving, physical inventory and excess management to simplify enterprise asset management processes by bringing your asset data to a handheld device.
- Provide insight into key performance metrics for self-assessment and operational decision making **with Sunflower reporting.**
- Track assets in real-time and automate location and status updates without user intervention with **Sunflower RFID solutions.** Utilize asset mapping and floor plans to record the location of assets within a structure.
- Operate confidently when managing **additional asset lifecycle processes**, including maintenance, shipping, kitting, configuration and more.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-based to help accelerate returns on your investments.

Nearly 7,000 of our experts help the U.S. federal government achieve comprehensive, scalable and sustainable IT and business goals. We enable our clients to execute digital transformation, build the federal workforce of the future, achieve operational excellence, enhance citizen engagement and protect America's assets. As the federal government faces unprecedented challenges, we remain committed to enabling its success, using our deep understanding of clients' goals and mission-essential needs to provide consultative insights and develop solutions for maximum results.

In the asset management market, CGI provides a broad portfolio of solutions that manage the asset lifecycle to help clients achieve total asset visibility, improve decision-making, accountability and regulatory compliance.
