Our **space and satellite software systems** are far reaching in both scale and complexity.

Our software supports earth observation satellites that measure the Earth's winds, **improving weather forecasting**, and **building understanding** about our changing climate.

It helps scientists keep track of land use, and highlights the impact of land clearance on our ecosystems.

And it's trusted to support a **critical part of the ExoMars Rover mission**, Europe's first surface mission to Mars.

When every second counts, **our navigation software** is trusted to help **search and rescue teams find people fast.**

And when a **humanitarian disaster strikes**, we support the **satellite communication services** that clients turn to, to manage crises.

The CGI experience – around the world

CGI is amongst the largest IT and business consulting services firms in the world.

We are one of the few firms with the scale, reach and capabilities trusted to help clients meet the ever-evolving digital expectations of their customers and citizens.

Operating in hundreds of locations across the globe, we consistently provide world-class solutions across an end-to-end portfolio, from IT and business consulting to systems integration, outsourcing services and intellectual property.

Our teams have experience in delivering award winning programmes in a range of industries:

- Banking & Financial Markets
- Communications
- Cyber security
- Defence
- Education
- Government & Local Government
- Healthcare
- Insurance
- Intelligence
- Law Enforcement & Policing
- Oil & Gas
- Manufacturing
- Retail & consumer services
- Space
- Transportation & Logistics
- Utilities

The proximity model

Our Metro Market model organises operations where clients have concentrated footprints, enabling local teams to build personal relationships to support client success.

Our teams across the UK are trusted to deliver industry knowledge and expertise to our clients as true 'local business partners' – skilled, approachable and committed to the community.

53 million smart gas and electricity meters will communicate through CGI systems.

And we're trusted to **deliver services to over 50%** of Scottish citizens.

Empowering Scottish students with faster digital connections, **giving them a head-start** in their education.

We're trusted to help ensure our armed forces receive **the right medical treatment**, as their medics now have access to over **350,000 centralised records**.

A true differentiator

Our in-depth understanding of local business environments is backed with the ability to collaborate across worldwide centres of excellence.

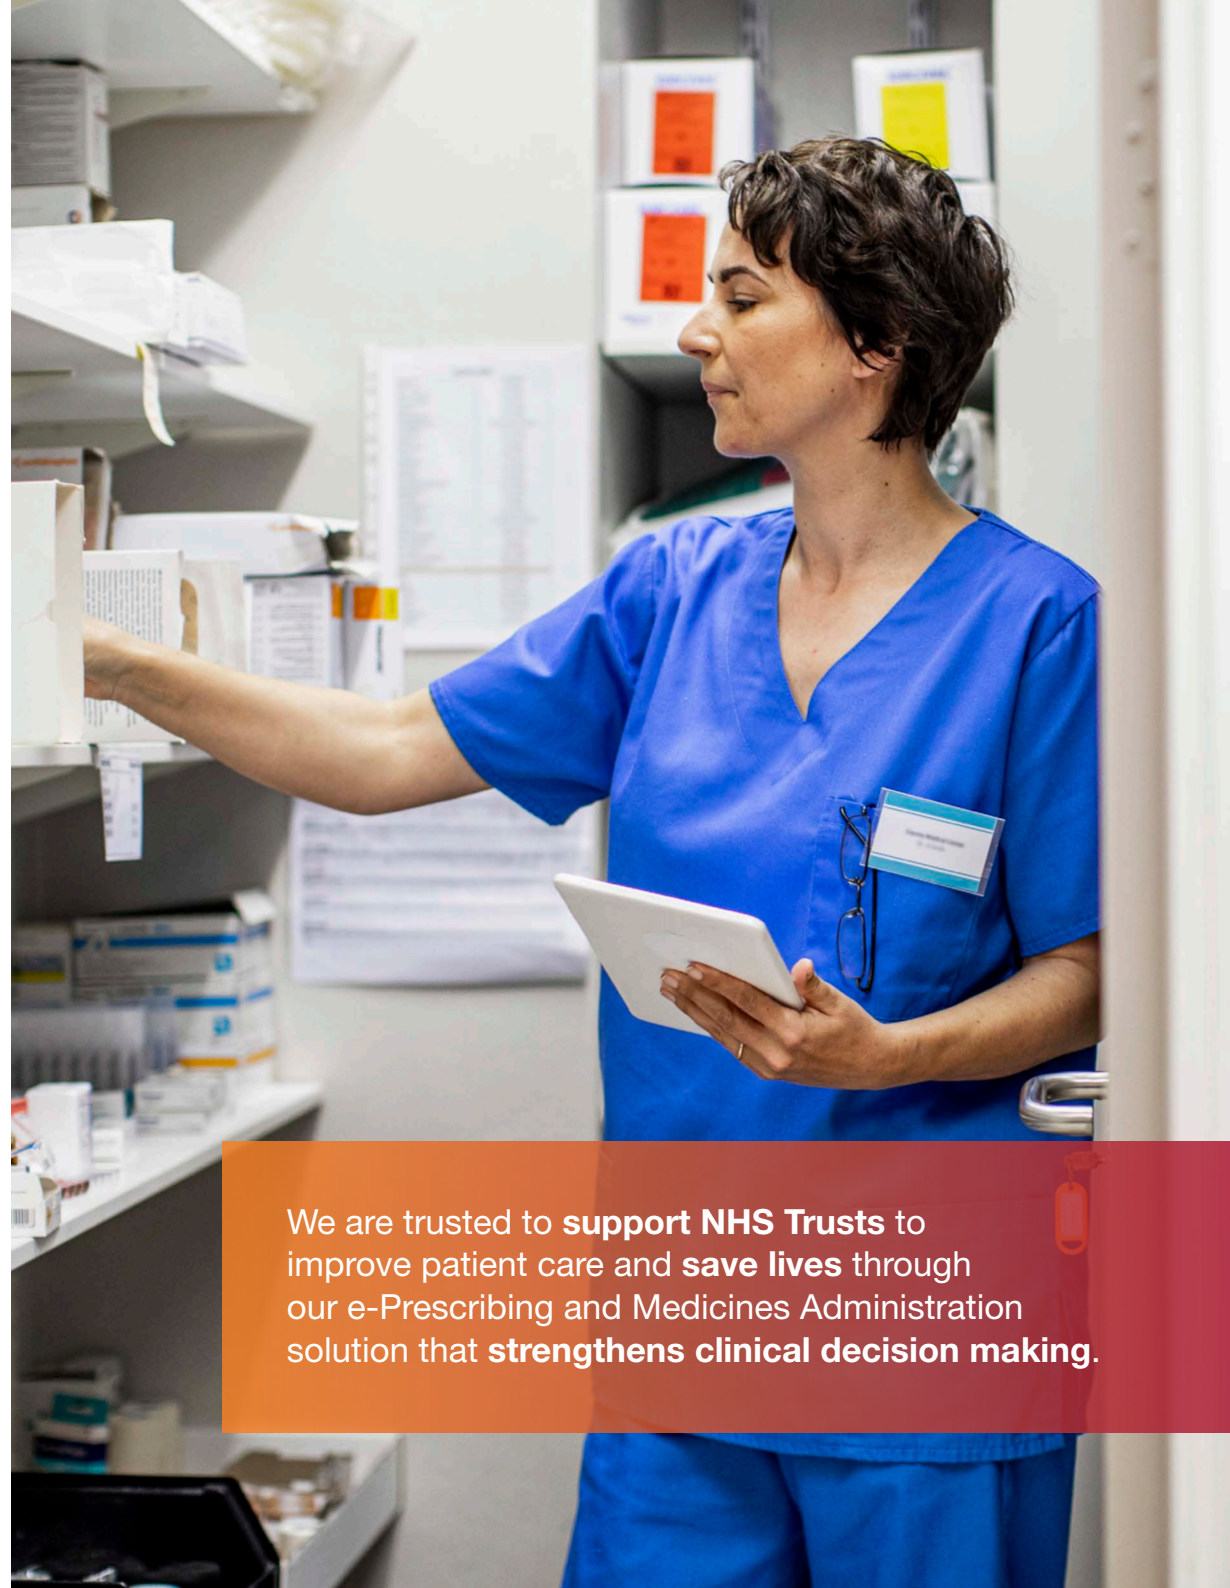

These include our global delivery network which further enables proximity teams with onshore, nearshore and offshore capabilities to support clients' digital evolution.

Excellence is also driven by the **CGI Management Foundation** which ensures globally consistent policies, principles, processes and frameworks – allowing us to deliver on time and on budget in 95% of engagements.

Accelerating your digital journey...

We offer end-to-end digital capabilities from strategy development to technology implementation and managed services – partnering with clients throughout their digital journey.

Our use of **Advanced Analytics** provides actionable insights in the face of increasing data complexity. At the same time, we can help businesses move from traditional IT services to cloud and hybrid environments with increased use of SaaS and software-defined networks.

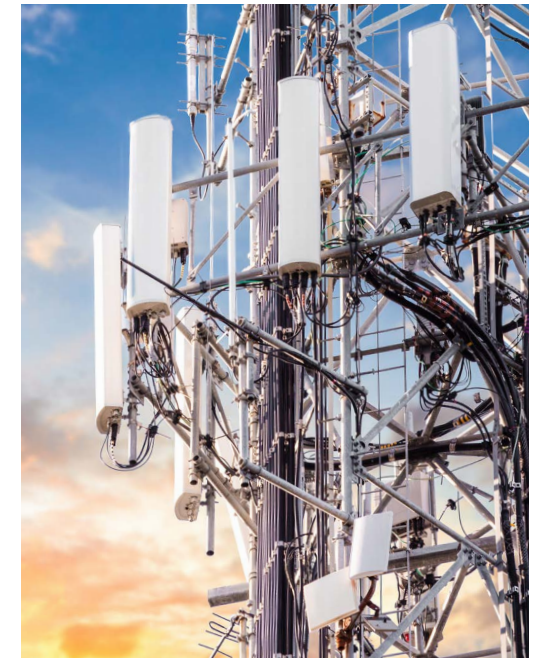

We are trusted to **support NHS Trusts** to improve patient care and **save lives** through our e-Prescribing and Medicines Administration solution that **strengthens clinical decision making**.

... in a changing, secure environment

Wherever clients are in their digital transformation journey, we can provide a full range of end-to-end IT and business process services, including consulting and coaching, as well as managing all DevOps in addition to traditional processes and tooling.

We are also able to take advantage of the **5G** revolution with the combination of a raft of technologies into one holistic ecosystem.

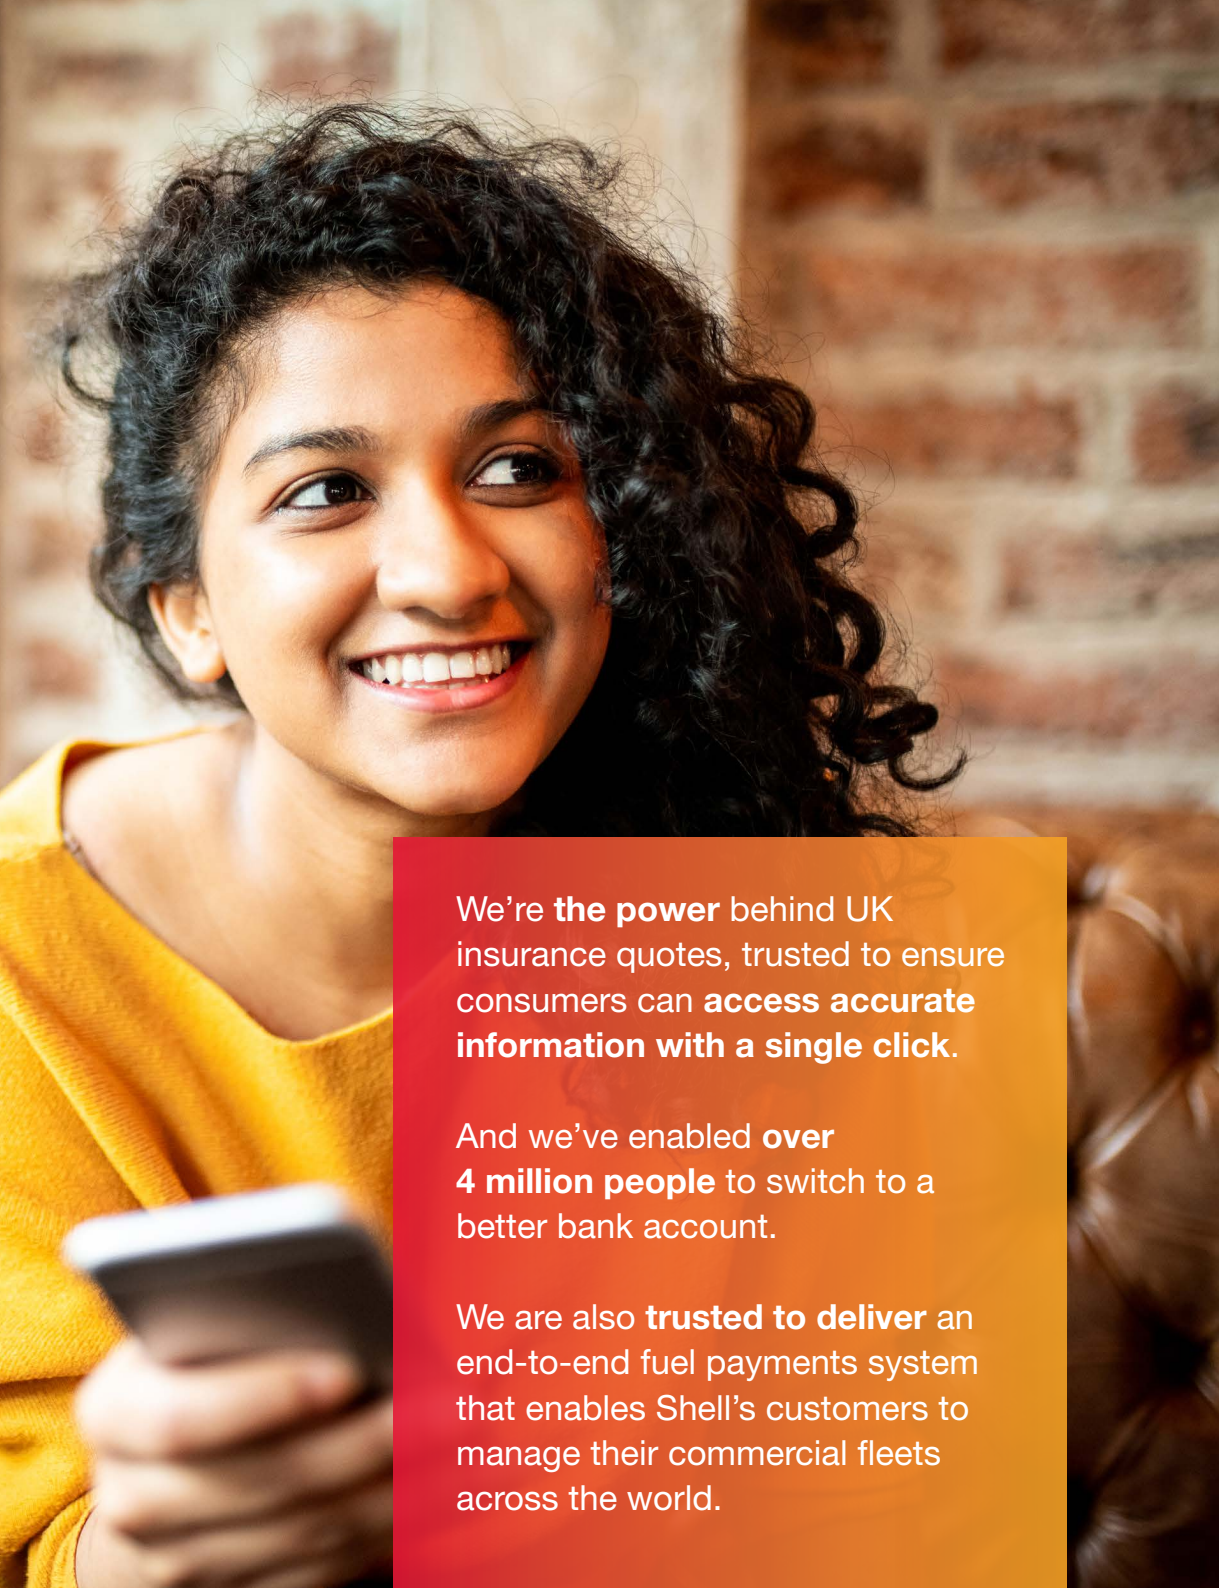

Critically, **Cyber Security** is inherent in everything we do, across complex security challenges that protect the most valuable assets of each individual client.

We're trusted to help law enforcement connect the dots with **intelligence-led policing** that better meets the challenges of 21st Century crime.

And to work with the UK Government to **protect our security**, by vetting people before they have access to sensitive information or facilities.

Innovation, change and emerging technology

With the ever-increasing pace of change, organisations are under pressure to adapt and innovate to drive competitive advantage and customer engagement.

Within the UK, our Emerging Technology Practice is focused on a core set of technologies and works with a powerful ecosystem of innovative partners.

As markets develop and new value chains are created, CGI is able to unlock value for each organisation.

We're **the power** behind UK insurance quotes, trusted to ensure consumers can **access accurate information with a single click**.

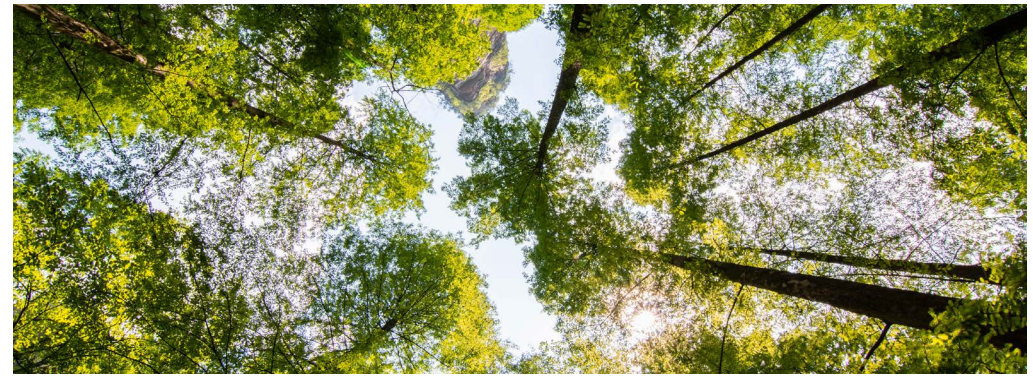

And we've enabled **over 4 million people** to switch to a better bank account.

We are also **trusted to deliver** an end-to-end fuel payments system that enables Shell's customers to manage their commercial fleets across the world.

Corporate responsibility as a key value

We recognise that we have a responsibility to the environment, our members, and to the communities in which we work.

That's why we build strong local relationships through volunteering and fundraising activities, and it's why we support the next generation with the tools and qualifications to build the community of the future.

Corporate responsibility in action

Our range of initiatives spans grassroots activities including career building, business building and environmental awareness.

In partnership with schools and community organisations, our **CGI STEM Camps** are inspiring the next generation of IT professionals, while **Daughter to Work Days** are encouraging young girls to consider a future based on an understanding of our working environment.

On a global level, we are playing our part in mitigating the climate crisis through our **No Planet B Programme** – generating awareness and embedding sustainable practices across our business. We are also signed up to the UN Global Compact.

About CGI

Founded in 1976, CGI is among the largest independent IT and business consulting services firms in the world. With approximately 77,500 consultants and other professionals across the globe, CGI delivers an end-to-end portfolio of capabilities, from strategic IT and business consulting to systems integration, managed IT and business process services and intellectual property solutions. CGI works with clients through a local relationship model complemented by a global delivery network that helps clients digitally transform their organizations and accelerate results.
