

Co-innovating to optimise costs and transform

CGI in Energy

CGI

Challenges

1

Depressed global oil demand

2

Less capital expenditure and increasing costs

3

Reduced workforce with relevant skills

4

Rising risk within the industry

5

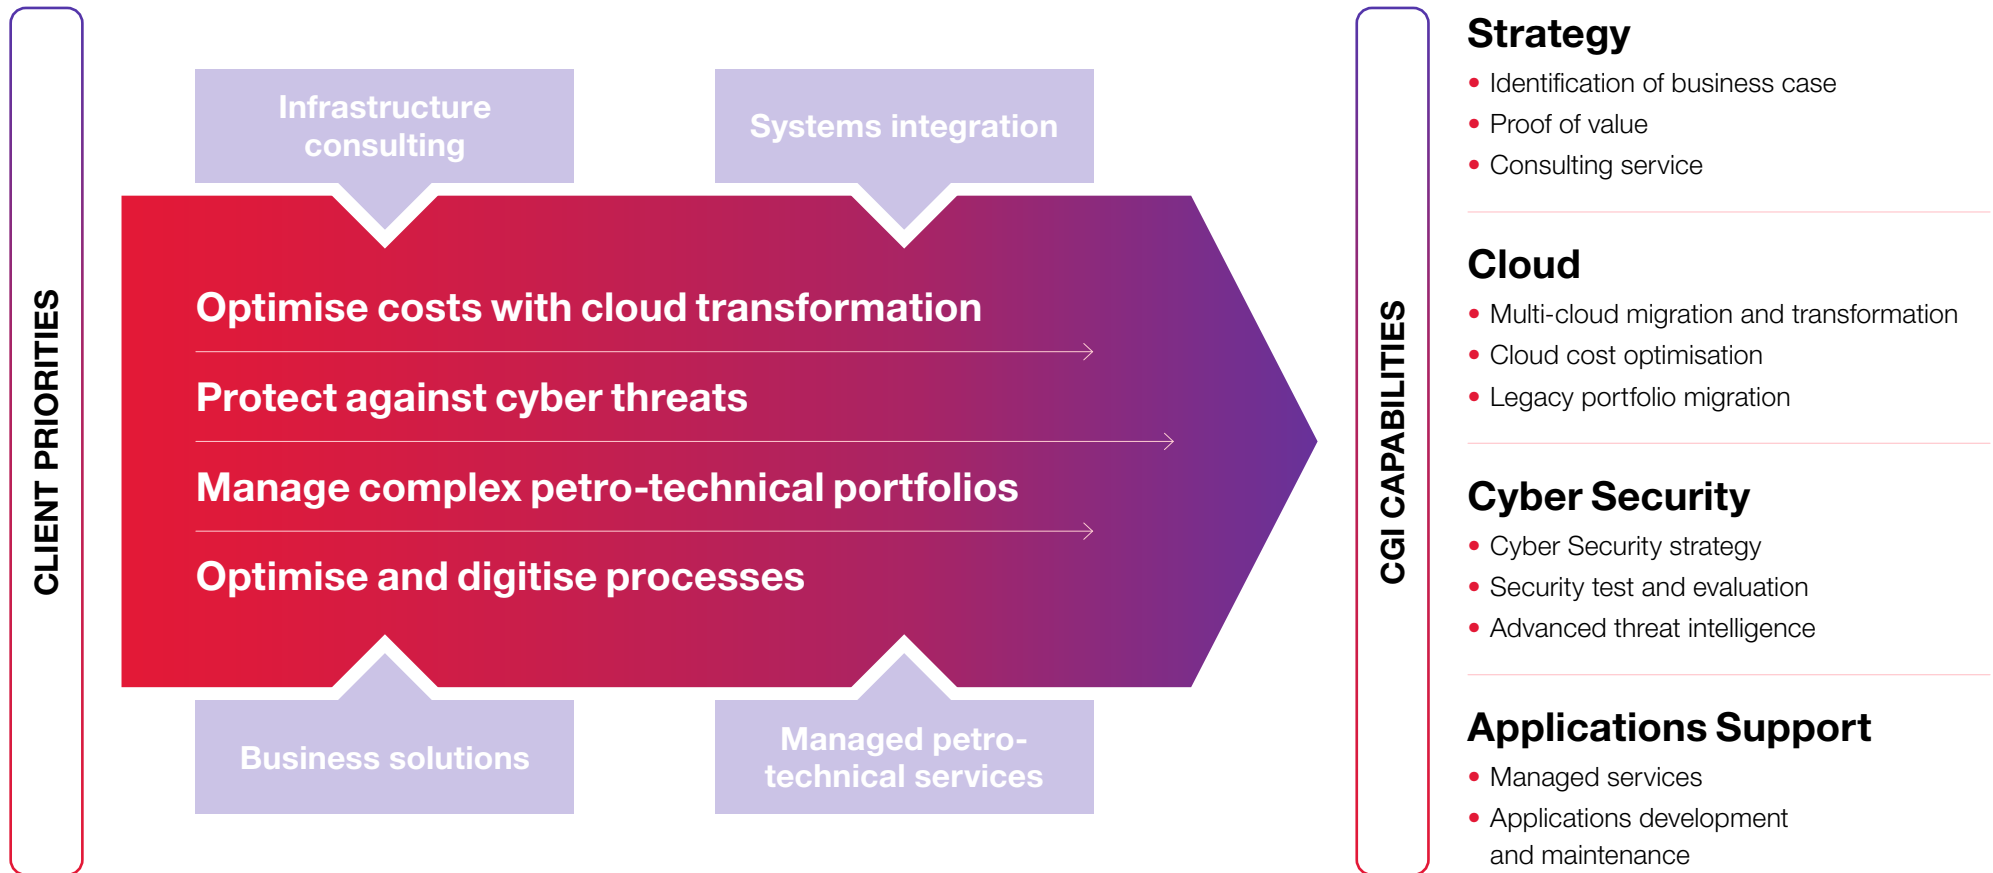

Increasing cost pressures

6

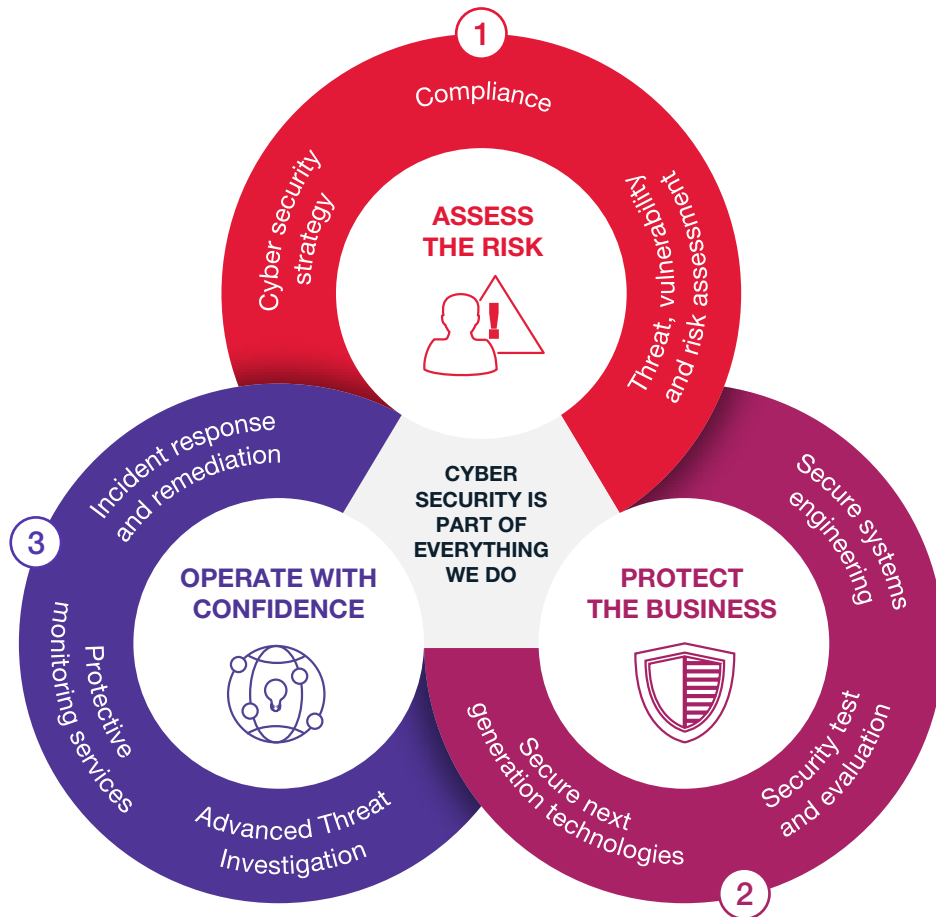

Increasing geopolitical and economic pressures

What we offer

Cyber security services to protect the business

1 We give clients confidence in their security

2 We build systems and services securely

3 We manage operational security services

CGI in cyber security

40+ years of experience across government and commercial sectors

3 accredited test facilities in Canada, US and UK

1400+ cyber professionals >80% with government clearances

6 Security Operations Centres globally

150+ clients in 16 countries use our managed security services

Tested and proven in some of the world's most sensitive and complex environments

The potential risks to the energy industry from a cyber attack range from health and safety all the way through to environmental damage. From exploration to refining to distribution and trading, our solutions and cyber experts help keep energy organisations cyber resilient. We use the principles of identify, protect, detect, respond and recover.

Application services designed to improve performance, enhance quality and drive innovation
