

# Sunflower Government Property Management Solutions

Government contractors are entrusted with managing billions of dollars of government property, including military equipment, IT assets, scientific instruments and materials for manufacturing.

Contractors are required to comply with increasingly complex requirements for management, assessment and reporting of accountable government property, including FAR, DFARS and other agency requirements, with significant financial and contractual penalties for non-compliance.

## Government Property Management

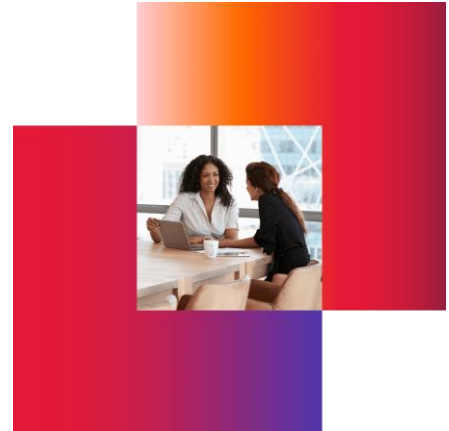

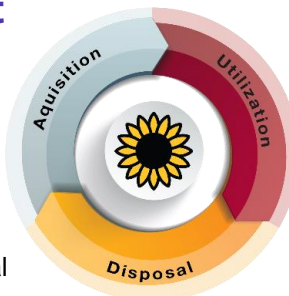

Sunflower solutions provide contractors with the tools to confidently manage government property, comply with contractual requirements and maintain government-approved management systems. Sunflower also provides ease of use for end users, a world class technology infrastructure and the flexibility to meet changing needs and evolving requirements. The Sunflower solutions are designed to support standard government property management processes for:

- Acquisition, use and disposal
- The DOD IUID initiative
- NASA and DOD financial reporting requirements
- Audit support
- A number of additional requirements for civilian agencies, the DOD, primes and subcontractors, and commercial contracts

## Lifecycle Asset Management

Sunflower solutions support program and mission success through cost effective lifecycle asset management. All required data elements for government property items are at your fingertips.

- Assign property to government or commercial contracts and subcontracts upon receipt
- Capture support documentation on lifecycle events

## Solution Features

- Manage serialized and material assets on government contracts
- Comply with FAR, DFARS and other agency property regulations
- Create upload files for IUID, WAWF and PCARSS
- Generate DD1149 and DD250 forms
- Streamline inventories and reporting with mobile and data visualization solutions

**Sunflower**  
Asset Management

- Generate DD1149 documents for movements
- Record and manage maintenance and calibration activities
- Conduct inventories through barcode scanners, online entry, or lifecycle transactions
- Manage closeout and disposal through PCARSS and the GFP module
- Receive and issue material assets
- Lifecycle transactional history resulting in positive audit outcomes

## Compliance

- Generate UIIs, print 2D marks and create files for IUID registry
- Report receipt of DoD property to iRAPT via flat file submission
- Produce DD250 for upload to WAWF
- Create NF1018 financial reports for NASA contracts
- Capture FAR required data elements on property records

## Features

- Web-based and mobile solutions
- Role-based security controls for access by project or contract
- Configurable to organization terminology and processes
- Scalable license options
- Cloud or on-premise deployment options
- Business systems integration

## Asset Management with the Sunflower Suite of Solutions

- Manage physical and financial accountability in **Sunflower Assets®**—a single web-based system that makes property activity easy to record, simple to retrieve, accessible from anywhere and completely auditable.
- Use **Sunflower mobile solutions** for asset receiving, physical inventory and excess management simplify enterprise asset management processes by bringing your asset data to a handheld device.
- Provide insight into key performance metrics for self-assessment and operational decision making with **Sunflower reporting**.
- Utilize **Sunflower RFID solutions** to track assets in real-time and automate location and status updates without user intervention. Asset mapping and floor plans let you record the location of assets within a structure.
- Operate confidently when managing **additional asset lifecycle processes**, including maintenance, shipping, kitting, configuration and more.
