Sunflower Fleet Management Solutions

CGI

Federal agencies rely on vehicles to carry out many program needs, and must effectively manage each vehicle in their fleet to reduce risk, control costs, enhance performance, and comply with federal policies.

Sunflower fleet management solutions offer a simple and streamlined way to capture important asset level data (ALD) throughout the vehicle lifecycle--from initial acquisition through disposal.
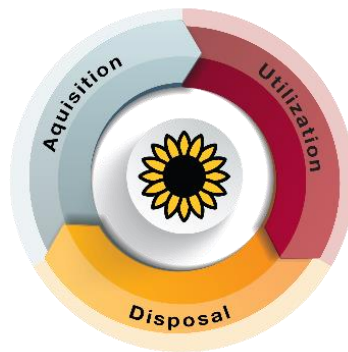

Take Control of Fleet Management Tasks

Take control of fleet management tasks with Sunflower fleet management solutions.

Lifecycle Events

Track, manage and report on fleet-related events:

- Vehicle acquisitions
- Fuel purchases and other indirect costs
- Vehicle recalls, accidents, damages and thefts
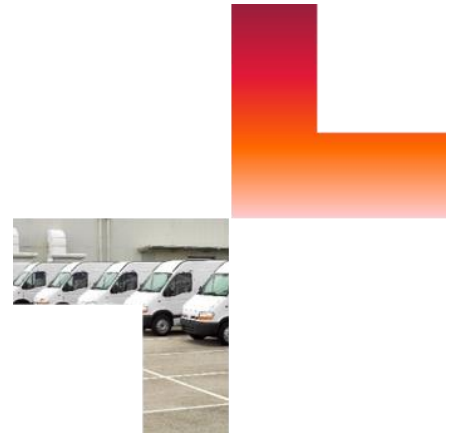

Maintenance

Record fleet-specific maintenance activities and utilize email notifications for:

- Preventative maintenance, work order tickets and calibration requirements
- Statistics such as cost and frequency of maintenance activities by type and cause

Business Intelligence

Utilize the robust reporting capabilities within the Sunflower business intelligence tools to analyze current and projected vehicle statistics:

- Analyze fleet composition and fuel consumption trends

Sunflower Fleet Management Solutions Features

- Record fleet lifecycle management from acquisition to disposal
- Integrate with other systems for: procurement, general ledger, fleet credit card purchases, GSA Fleet Drive-thru and Reports Carryout systems
- Capture fuel purchases and other indirect vehicle costs
- Record maintenance activities and utilize email notifications
- Automate the generation of ALD reports for annual submissions to the Federal Automotive Statistical Tool (FAST) database
- Utilize analytics to analyze current and projected vehicle statistics and usage trends

Sunflower
Asset Management

- Perform spending analyses for fuel purchases, indirect costs and maintenance events
- Identify maintenance related trends to drive procurement decisions
- Perform cost comparisons for leased vs. owned vehicles

Integration

Establish integration points between Sunflower Assets® and external systems to automate the capture of fleet-related data, such as fleet credit card purchases and the GSA Fleet Drive-thru and Reports Carryout systems.

Reporting

The Sunflower fleet management reporting solution enables streamlined, repeatable processes for submitting the relevant data to the Federal Automotive Statistical Tool (FAST) reporting database.

Generate reports that comply with interface acceptance standards, including data on fuel consumption, fleet performance and fleet inventory trending. Automate report generation for a streamlined, repeatable process that significantly reduces manual efforts to collect the required data needed for the annual reporting of asset level data (ALD), formally known as vehicle level data (VLD).

Asset Management with the Sunflower Suite of Solutions

- Manage physical and financial accountability in **Sunflower Assets®**—a single web-based system that makes property activity easy to record, simple to retrieve, accessible from anywhere and completely auditable.
- Use **Sunflower mobile solutions** for asset receiving, physical inventory and excess management simplify enterprise asset management processes by bringing your asset data to a handheld device.
- Provide insight into key performance metrics for self-assessment and operational decision making with **Sunflower reporting.**
- Utilize **Sunflower RFID solutions** to track assets in real-time and automate location and status updates without user intervention. Asset mapping and floor plans let you record the location of assets within a structure.
- Operate confidently when managing **additional asset lifecycle processes,** including maintenance, shipping, kitting, configuration and more.

"Over 50% of federal cabinet level agencies manage their assets in Sunflower."

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-based to help accelerate returns on your investments.

Nearly 7,000 of our experts help the U.S. federal government achieve comprehensive, scalable and sustainable IT and business goals. We enable our clients to execute digital transformation, build the federal workforce of the future, achieve operational excellence, enhance citizen engagement and protect America's assets. As the federal government faces unprecedented challenges, we remain committed to enabling its success, using our deep understanding of clients' goals and mission-essential needs to provide consultative insights and develop solutions for maximum results.

In the asset management market, CGI provides a broad portfolio of software features that manage the asset lifecycle to help clients achieve total asset visibility, improve decision-making, accountability and regulatory compliance.
