

Energy Trading & Risk Management (ETRM)

Rapidly evolving technologies; the challenges of Net Zero; volatile markets – all while delivering the critical national infrastructure that has to be available 24/7

All energy market participants are faced with the increasing pressure to innovate the way you do business. The demand is for robust, integrated, flexible trading solutions that minimise operational risk whilst maintaining your alignment with industry requirements. Although times ahead look challenging, with the right partner, opportunities can be identified to improve your ETRM platforms

ETRM systems are driven by intricate workflows and are widely utilised to support all aspects of your business including those not designed for; from trading activity and notification to data analytics and regulatory compliance

We offer an all-inclusive approach to Energy Trading & Risk Management that delivers incremental user-defined functionality and flexibility to deal with industry changes throughout its lifetime, achieved by following our deeply embedded delivery frameworks and proximity model

What CGI brings to Energy Trading & Risk Management?

Having worked with energy companies across the UK and continental Europe over several decades, we are able to provide both business and the technical expertise to help your business fulfil its potential

Our Energy Trading & Risk Management services align energy trading with strategic business processes that are underpinned by our team's expertise in:

- Portfolio hedging, logistics and contract management
- A range of market leading 3rd Party trading; risk management and ancillary applications
- A cluster of CGI and trading; risk management and ancillary applications
- Customised and comprehensive business-focused services

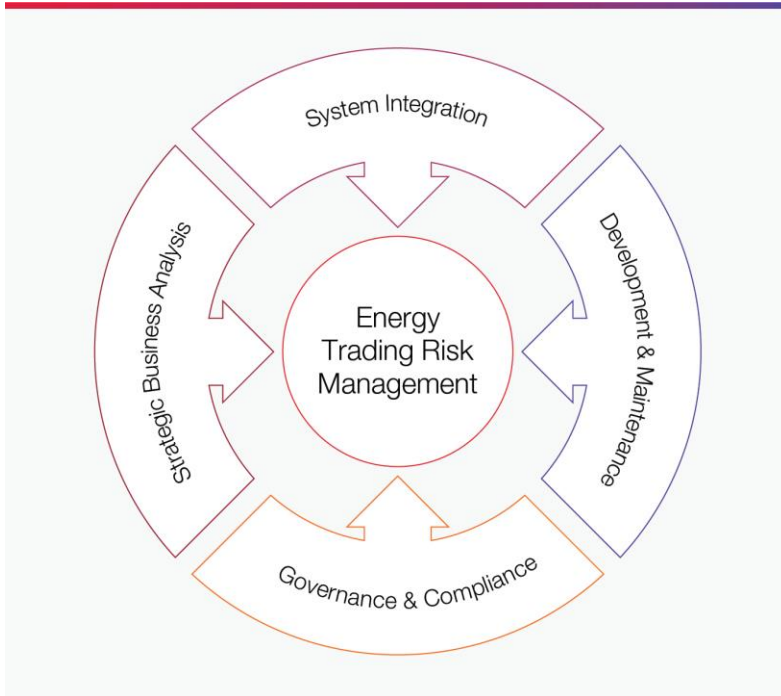

The CGI benefits
