

Sustainability strategy

Sustainability - Just another regulation? Just another cost factor? A challenge?

Or is there an opportunity to discover...

Our offer consists of a structured process where we guide and support you along the way

- We help you understand your current situation in relation to competitors, investors, owners, employees etc.
- We review current sustainability data and collect more data if needed.
- Together with you, we prioritize among data and futureproof your business by defining long term sustainability targets.
- We support you in creating action plans and integrate these with your strategy.
- We create a way of working so that you can follow up status and communicate results to your organization.

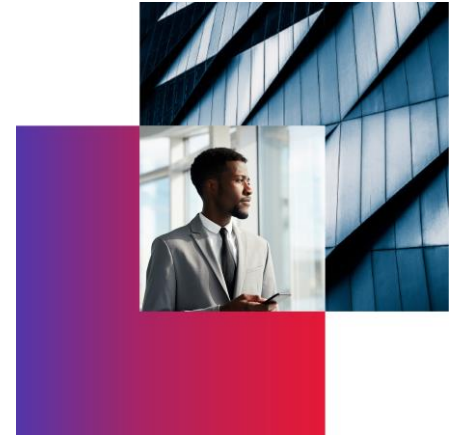

Sustainability assurance

You will benefit from using the expertise, methods and tools of CGI, to get on top of, and lessen your organizations climate footprint, by incorporating sustainability in your strategy.

Step 1: Understand/assess Identify which areas of sustainability and responsibility are both relevant and will have the greatest organizational impact.
