CGI Cyber Escape 2.0

Site Requirements:

Delivery:

Arranged by CGI's haulage contractor, who will require exclusive access to the designated safety exclusion area (as agreed in the site assessment*) for approximately one hour during delivery and around 30 minutes for collection.

Surface:

Requires a hard, flat surface (e.g., concrete) for placement
Grass or cobbles are not suitable

Space for Crane:

Space required for power loading crane (HIAB): 20m x 5m
Note: Additional to the area needed for the base (as per "Container Specifications")
Crane Reach: HIAB crane arm extends up to 8m to overcome obstacles

Delivery Truck:

Clearance Height: Height with container: 4.6m clearance required
Crane Height: Crane Boom height: 15m required post-delivery
Placement Width: 13m width space required for placement

Please be aware that health and safety are our top priorities. A thorough assessment and documentation process will be completed before any booking is confirmed. We will only proceed with bookings on sites that meet all safety requirements for a secure deployment.
