Cyber Escape 2.0
Helps educate local communities to becoming more cyber security aware

The first line of defence in keeping everyone digitally safe is making sure everyone is cyber security aware. CGI Cyber Escape 2.0 helps support the development of practical skills in a fun interactive experience. By taking part in this experience individuals will learn how to keep themselves, friends and families safe in the digital world.

Most children entering secondary school have smartphones with internet access - but many lack the knowledge and skills to stay safe in today's digital world.

At CGI we are committed to helping younger generations become cyber security aware and want to help them understand how to stay safe when they are online.

Over the past decade, escape rooms have become popular adventures for friends and families. Within the time allowed, participants look for clues, solve puzzles and decipher riddles to earn their escape.

The CGI Cyber Escape experience was developed by CGI's UK Cyber Security Practice to train, educate and engage with our clients and their employees to help understand cyber security risks, complement any existing security awareness training, and increase knowledge of how to reduce the impact of a cyber-attack whilst having fun. In conjunction with our STEM@CGI team, we have tailored the experience to appeal to, and address the specific risks faced by young people online.

Housed within a 40ft shipping container, CGI Cyber Escape can be delivered to schools and colleges for students and staff to participate in their cyber "adventure". Alternatively, it may be possible for students to visit us at a CGI location.

STEM@CGI
SCIENCE - TECHNOLOGY - ENGINEERING - MATHEMATICS

STEM@CGI is a global CGI programme developed to help build a diverse and robust IT talent pool for the future. Our team works in partnership with our clients, local schools, government bodies, non-profit and community organisations to conduct STEM (science, technology, engineering and math) camps and workshops that engage, motivate and inspire young people to explore careers in STEM. STEM@CGI focuses on students in demographics that are underrepresented in STEM fields, including girls, students from ethnic minorities and low-income families.

Cyber Escape 2.0
Helps educate local communities to becoming more cyber security aware

What to expect

- **Mobile Experience**: Housed in a custom-built container, the Cyber Escape 2.0 travels across the UK, so that we can deliver our cyber awareness experiences in the heart of the communities that we serve.

- **Collaborative Challenge**: Small groups (6-8 people) have an hour-long session facilitated by dedicated CGI Games Masters to manage the whole experience. We allow groups up to 50 minutes to escape then our Games Masters gather feedback and deliver a short debrief.

  – Groups work together to discover clues, solve puzzles and accomplish cyber related tasks in order to finish the game within the time allowed.

  – This interactive team-led approach enables participants to understand new topics and skills in a fun environment, helping to ensure that the knowledge is retained.

  – During their session, participants learn basic security practices such as the importance of protecting their privacy, creating strong passwords, physical security, device and document handling and navigating social media.

- **Delivering Social Values:** At CGI, we find that we share common outreach objectives with our clients, and we relish the opportunity to work in partnership. For CSR bookings, please outline your proposed deployment using brief bullets (eg outreach objectives, participant demographics & quantity, any geographic constraints, etc) so we can explore with CGI stakeholders and clients how closely your deployment will match their objectives.

- **Private deployments are also welcome**: If we are unable to match your enquiry to a "Social Values" allocation, subject to availability, we can accept outreach bookings at our commercial rates.

How to get in touch : If you would like to book our Cyber Escape 2.0 experience, make contact with our team by visiting our website to fill in our enquiry form

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.
