How can you protect your bank in a digital world?

Key challenges banks face in fighting financial crime

The cost of getting it wrong is increasing. Banks need to get it right every time.

CGI digital accelerators drive an efficient and effective approach to financial crime

Big data management

An integrated solution addresses these challenges

CGI's Protect the Bank solution: Manage through a single command and control center for all alerts and notifications

This solution is delivered through a combination of CGI products, processes and people. It analyzes **data** in **real time** and incorporates **intelligent self learning, case management**, **cybersecurity** to drive efficiency, effectiveness and protection.

It's all about people: Training, skills and awareness
