Smart Card Management

SMART CARD SOLUTION

Smart cards can be used to enhance the security in a company by providing strong authentication for employees or B2B partners. Smart Card Management is an add-on to Certificate Services. We offer complete lifecycle management for certificates stored on Smart Cards, which makes it easy for companies to start using them in their organization.

One of the big challenges with smart cards is when users forget, lose or accidentally lock their cards. We have developed a solution where a colleague can help you to make enquiry to authorize personnel to unlock card or receive a temporary one. It is possible to adapt the workflow for your needs. This does not only increase the usability of the application but also the overall security.

MULTIPLE USAGES FOR SMART CARDS

To maximize the usage of the smart cards you can include other services, which perhaps already exists in your organization, such as adding the functionality of a passing card or print picture and personnel information to the card's exterior and use them as a business identity card. It is also possible to add a magnetic strip or create a solution with a USB memory stick.

In the beginning of an arrangement we will look through your needs and recommend which smart card format would be most suitable. We will also help you with recommendations if you want some sort of wireless technology for entrance added to the smart card.

SIMPLE SMART CARD ADMINISTRATION

To simplify the process when a problem occurs with a user's smart card the administration tool verifies the card and suggests the steps that it believes the administrator wants to perform. If the card is locked the administrator will be transferred to the unlock procedure, if the certificate on the card is about to expire the program suggests to renew it. If the smart card is revoked the program will tell you.

The fact that the administration tool is easy to use makes it possible to assign the task to the personnel most suitable in your company. The reception or the watch post in the company entrance is often the place you go to if you have forgotten your passing card or key and now you can also move this function over there to get all support gathered in one location.

CERTIFICATE SERVICES
